

# How to be a Real Jerk

The art of the jerk is not an easy path for a being; dedicated effort and practice are needed to become a real jerk. Reading through this guide will build a solid foundation to becoming a jerk. Self boosting, ignoring others, and annoying society are a just the small amount of traits to accomplish a jerk's demeanor. When all these proven ways have been strictly adhered to, one shall be in sync with the jerk.

At first, total devotion must be given so as to properly understand what is expected of being a jerk. The number one rule for being a real jerk is to become utterly selfish. Self boosting, absolute conceitedness authority, and always acting higher than any others is how a jerk flourishes. People's feelings are of no consequence to a jerk; it's only about being better than all and boosting above the crowd no matter what circumstances arise. Don't have any regard towards anything unless it is for better interest of an ultimate jerk.

Along this path of self righteousness key traits are established and built upon. The hard work, grueling dedication, and ability to completely ignore others determines how much of a jerk can be attained. After feeling better than others, from self boosting, start to ignore them; they are lower people, so their feelings and thoughts mean nothing. Is Sue nagging in the day about her sour last night's date? Ignore her. Maybe Joe has some good advice for fixing that noisy washing machine; pay no attention to him.

Unfolding these tactics in a much broader sense expands the jerk mentality immensely. Aim for annoying society; one can easily achieve results from driving erratically in traffic, talking loudly on cell phones, or simply skipping someone in line at the check-out counter. Society teeters on a balance of pristine etiquette; breaking this mundane cycle or going against the simple flow brings chaos and imbalance.

Playing the role of the jerk is tiring; just like any other mastered form. Jerks in this world bring forth a balance that is not clearly understandable and recognized; they are dubbed nuisances in today's lifestyles. Overall though, they, jerks, bring excitement into what could be a very dull world of rule following drones. Jerks are very diverse individuals who spice up life with unexpected activities -- can't you hear Mike on his cell phone in the library? When a jerk is spotted next time, see Sue weaving through traffic like a nut-job, be honestly appreciative for what he or she bring into this world; because, it took hard work for them to become what they are. Instead of looking at jerks as pains in the rear, stop, admire, and visualize the suffering dedication, wrenching hard work, and prestigious discipline they used to achieve who they are, a real jerk.
